

Intersocietal Commission for the Accreditation of Nuclear Medicine Laboratories

6021 University Boulevard, Suite 500, Ellicott City, Maryland 21043
toll free 800.838.2110 fax 888.806.7519 web www.icanl.org

SPONSORING ORGANIZATIONS AND REPRESENTATIVES

ACADEMY OF MOLECULAR IMAGING
Robert J. Gropler, MD
President
Steven Wozniak, BS, CNMT,
RT(N), PET

AMERICAN COLLEGE OF CARDIOLOGY
Benjamin McCallister, Jr., MD
President-Elect
Prem Soman, MD, PhD, FRCP (UK),
FACC, FASNC

AMERICAN COLLEGE OF NUCLEAR MEDICINE
Sue Abreu, MD
Immediate Past-President
Lorraine M. Fig, MD, ChB, MPH
Secretary

AMERICAN SOCIETY OF NUCLEAR CARDIOLOGY
Kanny S. Grewal, MD, FACC,
FASNC
Scott D. Jerome, DO, FACC, FASNC

AMERICAN SOCIETY OF RADIOLOGIC TECHNOLOGISTS
Cathy Tarcon, BS, RT(N)

SOCIETY OF NUCLEAR MEDICINE
S. James Cullom, PhD
Vice President
Raghuvver K. Halkar, MD

SOCIETY OF NUCLEAR MEDICINE TECHNOLOGIST SECTION
Mary M. Dalipaj, PhD, CNMT,
MRT(N), NCT
Michael Kroeger, BHS, CNMT,
PET, NCT, RT(N)

MEMBER AT-LARGE
Diwakar Jain, MD, FRCP, FACC,
FASNC

EX-OFFICIO
Kevin G. Kett, MD

CONSULTANT PHYSICISTS
Edward P. Ficaro, PhD
George Zubal, PhD

CEO
Sandra L. Katanick, CAE

DIRECTOR OF ACCREDITATION - NUCLEAR/PET
Mary Beth Farrell, MS, CNMT,
NCT, FSNMST

Advanced Technonuclear Imaging Center Receives Accreditation by the ICANL

Cardiovascular diseases are the No. 1 cause of death in the United States. On average, one American dies every 38 seconds of cardiovascular disease – disorders of the heart and blood vessels. The American Heart Association estimates that the direct and indirect cost for cardiovascular disease and stroke in the U.S. for 2010 is \$503.2 billion.

Early detection of life threatening heart disorders and other diseases is possible through the use of nuclear cardiology procedures performed within hospitals, outpatient centers and physicians' offices. While these tests are very helpful, there are many facets that contribute to an accurate diagnosis based on nuclear cardiology testing. The skill of the nuclear medicine technologist performing the examination, the type of equipment used, the background and knowledge of the interpreting physician and quality assurance measures are each critical to quality patient testing.

Advanced Technonuclear Imaging Center located in San Juan, Puerto Rico has been granted a three-year term of accreditation in Nuclear Cardiology by the Intersocietal Commission for the Accreditation of Nuclear Medicine Laboratories (ICANL).

Accreditation by the ICANL means that Advanced Technonuclear Imaging Center has undergone a thorough review of its operational and technical components by a panel of experts. The ICANL grants accreditation only to those facilities that are found to be providing quality patient care, in compliance with national standards through a comprehensive application process including detailed case study review.

ICANL accreditation is a "seal of approval" that patients can rely on as an indication that the facility has been carefully critiqued on all aspects of its operations considered relevant by medical experts in the field of nuclear medicine. When scheduled for a nuclear medicine procedure, patients are encouraged to inquire as to the accreditation status of the facility where their examination will be performed and can learn more by visiting www.icanl.org/icanl/main/patients.htm.

ICANL accreditation is widely respected within the medical community, as illustrated by the support of the national medical societies related to nuclear medicine, which include physicians, nuclear medicine technologists and medical physicists. In addition, several insurance companies require their providers of nuclear medicine services to be accredited. However, patients should remain vigilant in making sure that their nuclear medicine procedures are performed within accredited laboratories, because for many facilities it remains a voluntary process.
